

下水道の正しい使い方 The Right Way to Use Sewage

Please aware that we cannot empty just anything into the sewage system.

The sewage system is a public asset of our community.

Every user of our city sewage system is responsible to observe rules to use it.

ゴミや油は流さない

Never dispose of garbage or oil in your drain

Emptying vegetable waste, leftover food, or waste oil from the kitchen into the drain will block up the drainpipe, so please do not do this. Even small piece of garbage from a food disposing machine can be stuck in the pipe, too. Do not empty them into the drain either.

危険物は流さない

Never drain hazardous materials in your drain

Never empty gasoline, kerosene, agrochemicals or other hazardous material into your drain. These chemicals may cause toxic gas, deterioration of water pipes, the collapsing of roads, or other secondary problems.

トイレには溶ける紙を

Use dissolvable toilet paper

Be sure to use only toilet paper. Tissue paper, diapers, sanitary napkins, vinyl, which does not dissolve in water should not be drained as they will block up a sewer pipes.

マンホール蓋は開けない

Do not open the cover of a manhole

Manholes are for checking and maintenance of sewage pipes, therefore, do not open or remove the covers without permission. Never dump garbage, dirt, or anything into manholes.

油脂類等トラップを設置されている方は定期的に清掃を行いましょう
Please regularly clean up and maintain grease traps

油流さないで・快適・下水道 Don't pour oil into the sewer

下水道を利用されている市民のみなさまへお願い

Notice to users of the Ogaki City Sewage System

How to dispose of waste oil

Reuse oil

Filter used oil with a strainer while the oil is hot and reuse it for cooking.

※Please be careful not to get burned by hot oil.

Wipe oil off dishes

Wipe oil off dishes before washing them.

Absorb used oil

Absorb used oil with paper or solidify it with coagulants. Then dispose of it as burnable garbage.

Notice to restaurant owners ~Do not pour waste oil into the sewer.

Install a grease trap in your restaurant kitchen in order to properly deal with used cooking oil.

Before processing oil

After processing oil

Maintenance of Grease Trap:

- ① Clean the basket once a day.
- ② Dispose of lard once a day as it is the cause of bad odors.
- ③ Remove garbage, fat, and oil floating in the trap once a week.
- ④ Clean the inside of the trap once every few months.
